

A Los Angeles Acupuncturist's Point of View

Tamara@LAacupuncture.net

De Odor Works

I was looking for an alternative to traditional over-the-counter deodorants and antiperspirants. The packaging, the cost and the chemicals were high on my list of why I wanted to give them up for good.

So, when De Odor Works offered me their product to test, I jumped at the chance.

I received my De Odor Works medical grade stainless steel wand and committed to 30 days of being antiperspirant free. To say I was a little uneasy about it would be an understatement. My first and only concern was whether or not the stainless steel would leach into my body through my pores. When I contacted customer service through email, my concerns were laid to rest. Within 24 hours, someone answered my email. No, medical grade stainless steel will not leach. Fine. I was ready to go.

For the next 30 days, I rubbed my De Odor Works wand in my underarms for 30 seconds per side whilst showering. I'm not going to lie, at the end of each day I smelled my shirts and my underarms during my 30-day experiment. No odor. This thing works! And it's super easy to hold and operate. The verdict is in. I am happy with my De Odor Works wand. I do not think I will ever purchase another over-the-counter antiperspirant. You may find out more, and purchase the product on the website: www.deodorworks.com.

Thank you for reading.
