Have you had a Mammogram or even been to the doctors office lately? If so chances are you were asked not to wear deodorant or any perfumes. This is inconvenient but doable. Now imagine you have breast cancer and your can't wear deodorant or perfume on a regular basis. Maybe scents make your nausea worse so you don't wear any.

These are the realities that you face when you have breast cancer. [De Odor Works](#) was developed in a lightweight stainless steel. It has the unique reaction that occurs when ordinary running tap water and stainless steel combine to neutralize odor. Using stainless steel with running water is a method of

eliminating the sulfur compounds that cause odor.

Perspiration by itself is odorless but micro organisms that cause odor thrive in damp moist environments created by sweat. There are worse places than your under arms to smell. It is also a “smelly” situation in the groin, feet and like areas. Using [De Odor Works](#) on problem areas for just 30 seconds in the shower can remove body odor and keep it from coming back.

[De Odor Works](#) is completely natural. It is non-allergenic and contains no chemicals. It won't clog pores or cause rashes or bumps like some deodorants.

Win it:

One Networking Witches reader is going to win a [De Odor Works](#)

Mandatory Entry:

Visit [De Odor Works](#) and have a look around. Tell me what you learned from their website.

Extra Entries
